soniehsaas2002@gmail.com | 8168320496 | [linkedin.com/in/ehsaas-soni](https://www.linkedin.com/in/ehsaas-soni)

Skills

Frontend: HTML, CSS, Tailwind CSS, EJS, Leaflet.js, JavaScript, Typescript, React.js, Redux, Chart.js

Backend: Node.js, Express.js, REST APIs, WebSocket, JWT Auth, FFmpeg

Database: MongoDB, PostgreSQL, SQL

Tools & DevOps: Docker, Git, Ngrok, Research & Development (R&D), Annotation

Work Experience

Sagar Defence Engineering, Pune

Jul 2024 - Nov 2025

Full-Stack Developer

- Built an advanced drone control and maintenance platform with path planning (Leaflet.js), real-time task tracking, and automated diagnostics—boosting fleet uptime and operational efficiency.
- Designed and deployed a secure real-time chat system for 200+ concurrent users using Node.js, EJS, and MongoDB; reduced message latency by 35% through optimized streaming and caching.
- Developed internal automation tools—including a flying sheet system and task management suite—using React, Tailwind CSS, and Node.js, resulting in improved reporting accuracy by 20% and enhanced R&D support for autonomous drone systems.
- Delivered scalable containerized applications with Docker and integrated Ngrok for secure remote development across distributed teams.

Education

JMIT, RADAUR

Aug 2020 - July 2024

B.Tech in Information and Technology

Project Work

- Drone Repair Management System

Tech Stack: React, Redux, TypeScript, Node.js, Express.js, PostgreSQL, Docker

- Built a full-scale drone repair platform with multi-image registration, diagnostics, repair stage tracking, and component-level monitoring.
- Implemented real-time repair updates, workflow automation, and dashboard with role-based permissions.
- Developed a Bill of Materials (BoM) module for part tracking, cost estimation, and inventory management.

- Real-Time Chat Application

Tech Stack: React.js, Node.js, Express.js, MongoDB, WebSockets

- Developed a secure chat application supporting private/group messaging, authentication, and file sharing.
- Optimized WebSocket connections and backend architecture for fast message delivery and reliable presence tracking.
- Designed responsive UI components enabling seamless real-time communication across devices.

- Task & Project Management System

Tech Stack: Express.js, EJS, MongoDB, Tailwind CSS

- Created a lightweight project/task management platform with dashboards for admins to assign tasks and track progress.
- Implemented secure authentication, session handling, and full CRUD operations for users, projects, and tasks.
- Improved team productivity by simplifying reporting, daily logging, and real-time progress updates.

Awards and Certificates

- Inter-College/Inter-University Cricket Tournament - 1st Position
- Zuno Campus Ambassador Internship Certificate
- Digital Productivity Certificate - NIIT Foundation
